

Arcana Scheduler and InfoMaker

Making things happen when you're not
there.

Arcana

- Release 2.3 (2.3.1.2)
- Remote Administration
- Notification options
- Actions and Conditions

InfoMaker

- Running on the Toolkit
- Creating Executables
- Unattended execution
- Command line options
- Printer selection
- Variables

Arcana

- New in 2.3
 - Easier application setup – use target file
 - Broader Result code options
 - Command line options and utilities
 - Multiple and mixed Notification Recipients
 - Bug fixes
 - Requires MS Installer

Arcana

- Remote administration from a client PC
 - Install Arcana Schedule Administrator ONLY
 - Choose authentication method
 - NT same login(digiadm) is the most trouble free
 - Connect to toolkit

Arcana

- Notification Options – who ya gonna call?
- Network message
- E-mail

Arcana

- Actions .. IF
 - It ran okay
 - It ran badly
 - It didn't start
 - It was stopped (by Arcana)
- ..then
 - Delete it
 - Disable it
 - Tell somebody (notify)

Arcana

- Conditions

Run only if ..

- Process is running or not running
- File exists or doesn't exist

Arcana

- Arcana to Reboot?
 - Shutdown.exe

InfoMaker on Arcana

- Why? – more control, automated
- How? – command line executables
- What's needed
 - InfoMaker Application (not on toolkit)
 - Correct IMSTYL7.pbl
 - Ability to create and deploy executables
 - Need pb*.dlls in toolkit\bin
 - The .exe, the .ini

InfoMaker

- Example: IMTKREP.exe
 - Create application – walkthrough
 - Install
 - Test from CMD
 - IMTKREP /?
 - IMTKREP /r food_drug_interactions
 - IMTKREP /rp food-drug_interactions
 - IMTKREP /rpc food-drug_interactions
- Add program to Arcana

Infomaker

- Input variables – ivsheet_by_unit report
- Job: IV Sheet for 2ESR
- IMTKREP /rpc ivsheet_by_unit /a 2EST

InfoMaker

- Default Printers
- New job: IV Sheet for 2EST on Bill
- `\toolkit\bin\defprint.exe`
- Chain the programs
- Change default back!
